## Feedback

- The students like Quiz time because it's easier for them. They can review the museums in these questions.
- After watching the video, the students have to write down their findings and exchange the findings to three partners. Some students cannot write very well because they cannot recall the images. Maybe we have to put some pictures on the board to support them.
- It's easier for students to make an acrostic together. But they have to practice more times for the chant.
